

- Cut out the squares with information about Earth.
- Put the squares in the columns of the evidence sheet depending on whether you think the evidence supports Earth being a planet, does not support Earth being a planet, the information is true but not relevant, or the information is not true.

Earth is 12 800 km across	Earth's orbit is in the same ring of orbits as other planets	Earth has a moon
Much of the surface is covered by water	Earth is known as the white planet	Earth orbits the Sun
Inside Earth is hot molten rock and iron	Earth is bigger than the Moon	Earth is one of the inner planets
Earth is warm	Earth takes a year to orbit the Sun	Earth does not give out light
Earth has craters and volcanoes on the surface	Earth spins	The surface of Earth is made of rocks and dust
Earth has an atmosphere	There is life on Earth	

Evidence sheet EARTH

EARTH IS A PLANET	EARTH IS NOT A PLANET	TRUE BUT NOT IMPORTANT	NOT TRUE

We think that the Earth is a planet / is not a planet (delete according to your decision).
Our reasons are:
