

We Are Learning To

communicate scientific ideas based on the evidence that is available.

What I am Looking For is for you to be able to:

- select and present clearly one aspect of the previous lessons, using appropriate scientific terminology (all);
- communicate ideas using accurate scientific language to demonstrate understanding (most); and
- present ideas clearly and creatively, synthesising information from a range of sources (some).

Lesson plan**Lesson notes**

Any of the activities can be adapted for use with all abilities. You may feel it necessary to direct some pupils to a particular activity to enable them to consolidate their understanding of a particular aspect of the topic.

The PowerPoint template is on the CD-ROM.

If you feel that any pupil has produced some outstanding work, please forward a copy to the CCLRC. Details of how to contact us are on the website.

Support information for teachers

Please consult with English colleagues for literacy support or refer to Key Stage 3 Strategy materials.
